### ClassPad 330

#### ClassPad 330 Built-in Applications

##### Advanced CAS (Computer Algebra System)

Base-n capabilities have been added for general-purpose numerical and mathematical calculations. Natural input/output mathematical functions have been expanded to include  $F$  (Fourier transforms),  $L$  (Laplace transforms),  $\delta$ ,  $\Gamma$ ,  $H$ , and more.

##### Differential Equation Application

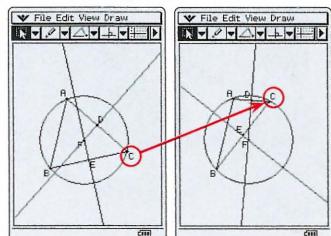

The solution set of a differential equation can be represented graphically as a vector field, and solution curves can be drawn by providing initial conditions for the equation. First, second, and  $n$ -th order differential equations are supported.

##### Financial Application

This ClassPad 330 application provides you with a total of 15 different financial calculations, including simple/compound interest, cash flow, amortization, depreciation, bond calculation, operating/financial leverage, and more.

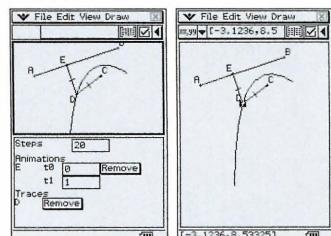

#### Geometry Application

##### Geometric Graphing

Students can learn the general theorems by drawing figures, and can confirm that a theorem still holds true even when the form of the triangle is altered.

##### Animation

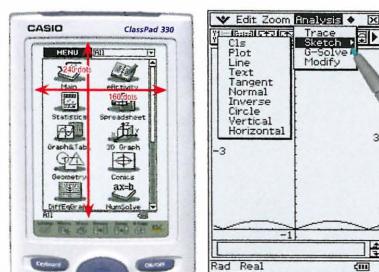

An Animation function provides the means to move geometric figures drawn on the screen. You can even plot the locus for a particular point of the animation. The screenshot shows an example where Point D is plotted as the locus for Point E moving on Line AB.

#### User-friendly Interface

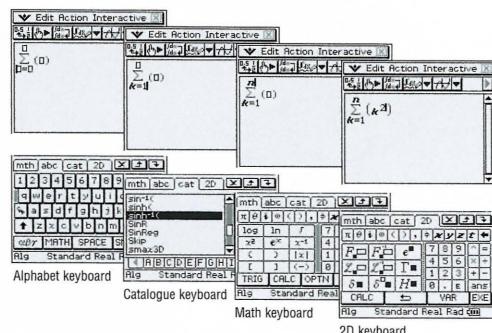

##### Pen Touch Operation

Intuitive stylus operation for entry of values and expressions, selection of menu commands, drag-and-drop copying of values and expressions, and much more. A big 160 × 240-dot LCD simplifies operation and shows more data per screen.

##### Natural Textbook Input and Output

Fractions, powers, and square roots, as well as high-level mathematical expressions such as  $\log$ ,  $\Sigma$ ,  $\int$ ,  $d/dx$ ,  $\lim$ , matrices,  $F$  (Fourier transforms), and  $L$  (Laplace transforms) can be entered and displayed just as they appear in your textbook. An on-screen soft keyboard helps to simplify entry of complex expressions.

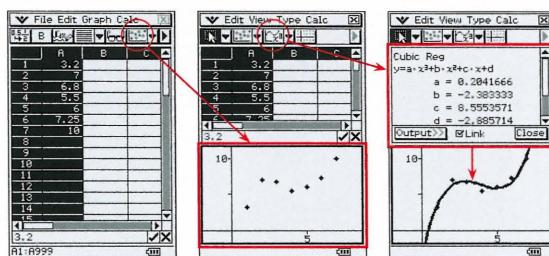

### ClassPad 330 Built-in Applications

#### Spreadsheet Application

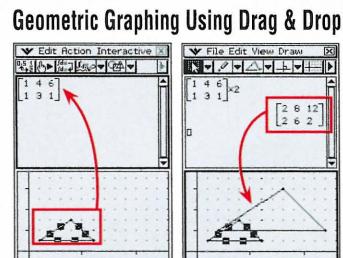

##### Improved Spreadsheet Application

Collected data can be organized and tabulated for analysis after statistical graphing is complete. Spreadsheet data also can be used in table calculations. In addition, ClassPad 330 adds the following functions: search, sort, data import from and export to lists, matrices, and variables, CellIf, and Histogram/Box-whisker graphing.

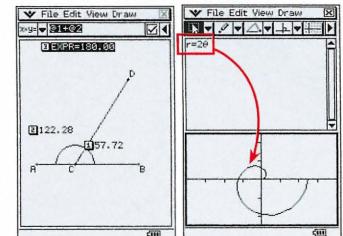

#### Geometry Application

##### Geometric Graphing Using Drag & Drop

Dropping a geometric figure into the Main application window will produce the numerical data for the figure. Conversely, dropping numerical data into the Geometry window will produce the applicable figure.

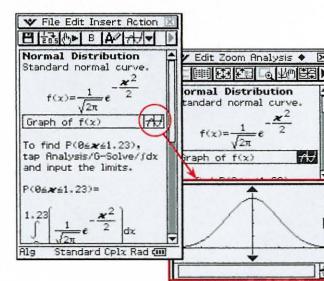

##### Enhanced Geometric Functions

ClassPad 330 supports drawing of conics using a focus, as well as graphing of polar equations and parametric equations. Enhanced labeling capabilities let you display attached angles, measurement-based calculation results, and more.

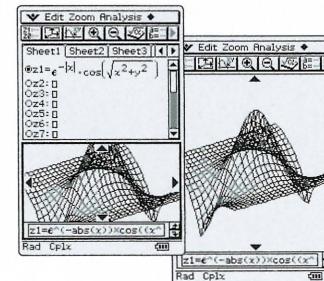

#### eActivity Application

An eActivity is like a digital worksheet that can be created and worked with on the ClassPad 330. All of the powerful features and capabilities of the ClassPad 330 can be incorporated into an eActivity. In addition to being able to perform the same calculations as the Main application, an eActivity will accept text entry, just like a word processor. Graphs, as well as Geometry and Spreadsheet data also can be stored in an eActivity file.

#### 3D Graph Application

The 3D Graph Application lets you draw rectangular coordinate graphs ( $z = f(x, y)$ ) and parametric function graphs ( $xst = f(s, t)$ ,  $yst = f(s, t)$ ,  $zst = f(s, t)$ ). You can split the display screen between a 3D Graph Editor window and 3D Graph window, or enlarge the 3D Graph window to view a larger graph.

## Main Functions

### Algebra Applications

#### Computer Algebra System (CAS)

Using the Computer Algebra System (CAS), students can factor expressions, find limits of functions and calculate derivatives, integration and Taylor series expressions.

The CAS is a CASIO original algebra system that was devised through the cooperation of CASIO engineers, Professor John Kenelly, and other math instructors. It directly incorporates advice and suggestions from math teachers.

#### Factorization

```
rFactor((x^2+5)(x-2)(x+2)(x^2+1))
(x-2)(x+2)(x^2+1)
```

#### Differential

```
differential sin(x)*x
e^x*cos(x)+e^x*sin(x)
562988 5848 128 6+x
```

#### Taylor expansion

```
Taylor(exp(x),x,0,5)
x^5/120 + x^4/24 + x^3/6 + x^2/2 + x
```

### Algebra -

#### Easy equation manipulation by students

The Algebra application makes it possible for students to expand and simplify equations on their own as they derive solutions. After learning to solve problems using the Tutor application (see below), students can use the Algebra application to master the steps of solving algebra problems.

#### Step-by-step View

Easy-to-follow steps guide students to the solution.

```
R1+B=C
R1+B-C=0
```

```
R1+B-B=0-C
R1=-C
```

```
sin(1.5*pi*(x+1))
sin(1.5*pi*x+1.5*pi)
```

### Tutor

Like having your own personal tutor always on hand to guide you along the way!

The TUTOR application guides student to the final solution, much like a teacher does in the classroom. The TUTOR application has three modes.

- Auto
- Manual
- Verify

## What makes a CASIO "HEAVY DUTY Calculator"?

### Extra Large Display

Larger display makes more data easier to read.

Actual size

### TWP (Two-Way Power)

Solar powered when light is sufficient, battery powered when light is insufficient.

### Function Command Signs

A symbol (+, -, ×, ÷) on the display indicates the status of operation you are currently performing.

### Key Layout and Key Cap Shape

Keys are ergonomically shaped and configured to match natural finger movements.

### Heavy-duty Durable Keys

Keys are produced by injecting plastic of two different colours. Key markings are plastic, which means they do not wear or fade with use.

### Silent Touch Keys

Keys are specially designed for silent operation when compared to previous CASIO calculators to help maintain a more pleasant working environment.

### Key Rollover

Key operations are stored in a buffer, so nothing is lost even during high-speed input.
